INTRODUCTION

Skills as an administrator. A military leader, and a politicism. During the course of play, you must minimal the defeate balance between the administrative military, and political functions of your dominion. The manss of the lands and the neutronies in CASTLES II are boxed on 14th century Prince. A transitionary period in European Instory, which was marked by the positinged conflict of The Funds of Veges Wig. This country our marked by chooses the struggle for land in France had a high cost or immunitie. The blood of English and French soldiers summed the soil and the persons of these lands were forcefully removed from their bonnes, toped, or killed.

Lord conquered new lands, by would ben'd saviles there to substantiate his power over the newly acquired territory. Your mission is to unite the servicious of the mythical land of Bretague in the modes of this bloody turnoul and exemptally become King. It is a formidable task, one that requires intestinal formidable rank, one that requires intestinal formidable rank, one that requires intestinal formidable ranks, and risk taking. If you possess these qualities then you are ready to accept the challenge of CASTLES III Sage and Company.

OBJECT

The ultimate goal of Castles II is to be enoughed Eng. This is accomplished by peninoning the Page to back year claim to the throne once you have expanded your empire to a point of

considerable wealth and power, All the while, you must keep your people happy and manuan good relations with the Pope. If you are named King, the game is over and you have with. If, at some point during the game, and of the other players peritions the Pope and is mented King, then you have lost the game, and quite possibly, your life. You may choose to play is one of five fending lords from the families of Albion, Burgundy, Amour Aragam, and Valois. You select one of these, and the componer plays the other hear as well as the Pope. A game of Caules II will commence on January 1, 1312, and will committee the bottom eight of the main game serier.

O build costes. There are many obstacles and challenges that arise throughout the game which often hunder your quest to become King. If you manage your land with efficiency, the effects of these diversions can be minimised and the throne will be wither your grasps.

The picture left prover a contrast of or the garre, a stalking map have been and a messages wind as

GETTING STARTED

When Casiles II is leaded, their will be several introductory severas which are up the premise of the joint Orice the introduction is complete, the Ser-up Screen appears offering several options for game play. Here you will choose the Player whose role you wish to assume, the Difficulty level (Easy, Effect and Improvible), whether you want Plats on or off, how you want the Commodates distributed (Balanced), Cooprophical or Bandeon), and if you want factor Bandeon or off (Inc. 2014) and from the Commodates will place them where they laggedly should be found (i.e., 2014) and from method monotones will place them when they laggedly should be found (i.e., 2014) and from method monotones will place them when they largedly should be found (i.e., 2014) and from method monotones will place them when they largedly should be found (i.e., 2014) and from method to uncome a balanced one of runninadistics during the course of play. When you have made your choose, click in Play, and the game will begin, or Luad, to load a seved game. (Only available if you have the optional FDD)

The next screen that will appear to the Main Game Screen, where most of the game play will occur. The centre of the screen is a map of the entire kingdom, divided into 36 territories. Each territory has its own outmissibly. At the top of the screen your Roungs Point Pool will be displayed. The size of your Army and the amount of your Commodines are located to the right of the Point Pool. The Task Russ are located on the upper right of the screen (at the beginning of the game there will be three of these bars). At the bottom of the screen is the Message Window, which will display virtually everything that occurs during the course of play. Just above the Message Window are than buttons – Stock, Army, Relat (Relations), Opes (Options), Elizking on one of these buttons will access that particular area.

TUTORIAL

Office the best way to learn it by thing. For these who want to start plening the game insunchanely, this section will get cour readm established with a complete Exercitories. You can play and experiment from that point. If you get suck you can easily refer to a specific section of the normal for assumance. Using the Lein Monte Burron, click on the Play as Albon arrow. First as the Difficulty Level and turn the Plays and Burtles off. Click on the Play as Albon arrow. First as the Difficulty Level and our Commodity assigned to that area. As this point you have the capability to perform three Tasks, our Administrative, one Military and our Political. Begin by building your extraoraty. As marnioned above, your territory has a particular commodity which can be grocessed. Click on Stock and select the commodity that is available to room they point click on the word Gather near to the Commodity. Click OK and you are now performing one administrative task by gathering a commodity.

Next, you should build your army, which is a Military task. Click on Army and select whichever aspect of your malitary that ran be recruited (click on Reet next to a division of the army) and then click on the OR button. Now click on one of the territories adjacent to your starting pro-cinice and click on the Score button, followed by OK. At this point, (once scouting is a political function, you are now performing one Administrative, one Military, and one Political function — you are number at maximum efficiency. In is always recommended that you keep your task, performing potential at its maximum.

Once these there tasks are completed, you are most likely in a position to attack the territory that you have just sounced. However, if this particular territory is occupied by the Pope, you DiO NOT want to attack it (see section called The Pope).

When you have finished Scotting the territory you choose againfied by the Task that thipping over with the message Scott Complete), Scott unwher territory. Do the same with the Crahering taskyou choose gardier. A shorthand way to redo a task is by chicking on the Task But that just completed. This will palaunch the same task. Once you have captured three territories you may want to consider building a castle. Every territory that you hald must unclude at be adjacent to a territory in which you have built a tastle or you risk the possibility of revolt from the people in this conquered land.

To Isuald a costle click on the termony in which you wish to build in Click on the Visit option and a map of the serious used will appear. Choose a grassy (dark green) area upon which to build your castle (you can more the group by clicking on the directional arrows located at the bottom right of the acreen a holding down the red business will seroll consumously.)

Next, click on Drogo to beput designing your castle. Every could need a flag or Keep, walls, a door, and some towers. First, place a Keep by elicking on the flag from and then clicking a second time on the map where the Keep should go. This is how you by our the floorplant of your castle, clicking on the piece you want to place, and then clicking the spot on the map where you want the piece placed.

Now orm need to enclose the Keep with walls, doors and towers. Click on the round tower icon as the bottom of the series and place it on the map a few spaces away from the Keep.

Now elick on the tall wall trun on the lower right of the servers and attach it to the tower you previously placed. You can continue to place will segment without clicking on the lower from but you must click on a new form to place a new poor on the map. Continue placing walls and towers (don't forget a door) until you're happy with the castle. If you want to reaso a piece already placed just olick on the crass from the X1 and click on the piece you want to remove. (Shortent If

tWhen all is raid, use cament, in a sand that is taled by purpose and links and effect with every cause except the content of remand. Action by using a painted is

ficile". E F Scot you have rawers and walls placed on the step and you want to charge from placing only to construent or size versal, that click on the type of piece already on the map you want to change to and the causar will default to that piece. This saves you from having to more the monor down to the iron. In every time you want to place a different piece on the map.

When you're done designing your castle, chek on the View button and then stick on the Leave button in stream to the Main Game Screen. You'll now see a small tower non-on-the province sheld, drowing you've designed a note there. When you are ready in build the castle cleak on that territory, and choose the Build Castle option which will now appear in the message window. (For the specifies on castle building, see the section critical The Castle, if Build Castle does not appear, you either do not have sufficient resources to build the castle or are busy with another Administrative task.

This should provide you with the basics to get started Just renormer to keep performing tasks in all three areas (Administrative, Military, and Pellinck) simultaneously

PERFORMING TASKS

Fig. 16 fully comprehend the essence of Cartles II. it must be understood that it is a task based game. Anything that you want to do is done by way of accomplishing a task. There are three different types of tasks (administrative, Military, and Political. These tasks are colour coded. Green for Administrative, Red for Military and Blue for Political.

For each type of tasks, you have a certain number of ability points. There are three sets of two

numbers displayed at the apper left-hand corner of the Main Gaine Screen. The bottom number of each set is the overall rating in that category and the top number sequences the available points from that category that you can apply trouvel performing table.

Your rating will increase as you successfully complete tasks. For example, as you successfully complete administrative rating will improve and you will have more points to distribute among your tasks in the fature. If, in addition, you applied ratings points to a rask from different areas, (such as adding 2 military and 2 diplomatic points to the 3 administrative points used to baild a castle s you would got partial credit towards advancing sour military and diplomatic ratings.

At the beginning of the game, there are three task bars in the upper right hand corner of the Main Came Screen that can be used to accomplish the three types of tasks (Administrative, Milliary and Diplomanic). Three must bars can be added as the game progresses. The top has so for Administrative tasks, the maddle bar is for Milliary tasks and the bottom bar is for Political tasks. Each bar can only perform one task at any gaven time.

While a rask is being performed, three numbers will appear on the left olds of the Task flor. These numbers indicate how usual points from the point pool were applied toward a task. The fix left number is the amount of Administrative points, the middle one is the amount of Military points, and the number on the right represents the amount of Political points. When a task is being performed, the task berwill fill up from left to right. The task is complete other the but is completely full, it you wish to repeat the exact amortisals assuming it is available to you, chell on the task but will thus is quicker than preceding into the message window to set up the task. If you slick on the task but while a task is being performed, the unestage window will open up and inform you or how close your are to completing the task. It will also give you the option to caused the task at this point or re-continue a by chelling OK.

The speed with which a rask can be accomplished in determined by how many rotal points are applied to it. The rune points applied to the task, the taster it is accomplished. Also, when performing a task in any given area you must due more points from this particular area of the point post than enforced the other two. For example, suppose you have it administrative points. I military points. I political points, and you want to perform an administrative task. If you choose to use all if of your administrative points, you may use up to 5 of your military points and up to 3 of your political points are interned to give too more total points to apply roward the administrative task and thus special it up.

Once you willness a raing of 5 in any of the task categories, a second Task Bar in that category will be added to the Main Game Server. As long as your rating is at least 5, you will be able to use the additional task but II your rating chops below 5, you will have the second task but, Ideally, you will true b the maximum mander of six task buts (two administrative tasks, two nalitary tasks, and two polinical tasks).

How to Play Castles II

(Establishing and Maintaining the Realm)

ADMINISTRATION FUNCTIONS

The administrative functions included harvesting food, mixing tunber, moning from tefaning gold, and building caules, it is important to establish a strong economy early in game play, because or many of the other tasks depend upon the availability of certain commodities. For example, the military task of recruiting archers copines gold and tember?

Each territory contains a particular commodity. Once you have captured a territory, you can then begin an gather that commodity. For example, if you capture a territory adjust commodity is used, you can perform the administrative task of mining from As soon as you have completed any carbering task, your stockpile of that commodity will increase.

If you choose to gather a commusion that you hold in multiple territories, you will receive omis of that commodity equal to the number of territories in which you hold it you will also need to apple the same amount of administration points to the task. In other words, if you have there territories in which gold is your community, when you refine gold you will add three must of gold to your economy—as long as you apply at least three administrative points.

Also, once you build a large enough coatle (see the section on The Castle) on a territory, the production of that territory's community is doubled when gathered. Our shortest to implementing the gathering task is to click on one of the commodity teams displayed at the top of the Minn Game Screen. If it is possible to gather that them, a task roll begin.

THE BLACK MARKET

If you need to add goods quickly to your economy, it is sometimes—beneficial to trade on the Black Marker (The Black Marker opinion can be accessed the same way that the commodities are accessed—under the Stock (bes). You can immediately trade a good that is plentful for our than as lacking, at as cost of three for one (be careful though — constitute the black market is an immediable medium and you can be cheated by these with whom you attempt to trade. Polleting the realized on the black market.

THE CASTLE

The best may to solidify coun realin and eliminate the providulars of revolt be your people is to build a castle. Building a castle in a territory also makes it more difficult by an attacker to capture that remiting, as it is easier to defend a castled territory dynamic without a castle.

To preprie for deagaing a sastle, chek on the territory in which you want to build it. The message wondow will open and you will be given the option to Vest or Code over the section entitled The Pope for information on ceding) that territory. Click on Visa and a map of the territory will appear on the series. You need to select an orasthat is suitable for construction. You cannot build a castle on water or or a swamp, and por cannot build directly on top of a tree or a cock. Clicking on the directional arrows on the bottom right of the series allows you to second over the map. You may also serial the map by cheking on the edge of the series. Clicking on the centre of the arrows enables you no man the riew elockwise by 90 degrees.

Once you have decided up a proper location for the castle, click on Design and begin designing vant castle. All of the functions available to you daring the designing process are located in the boses at the bottom of the screen. I just you will need to place the flag or Keep on the map - the Keep represents you and the administrative control of the easile. Once it is expeuted by an opportent, the castle is lost so it is a good idea to put rings of walls and inwers around your Keep. To place the Keep on the map, elick on the flag box at the bottom of the stress and click again on the spot on the map where you will to place it. There are two types of newers that can be used -Seaure or Hound. The square towers are not quite as effective as the round towers, as they rend to have blind spots. The mound towers, although they are better for defence, take a longer time to build than the separe newers. To place a newer, click on the box at the bottom of the serven and click again to place it on the map. You also have the option for thick or thin walls. As you might expert, the thick walls are better for defence but they take longer to build than the thin walls. For both the towers and walls, you also process the option of Tall vs. Small. Keep in mind that when you are constructing walls and towers around the keep, you must assure that the keep is accessible. You connot build walls and towers on all sides of the Keep to make it impenetrable, you must place a door in the perimeter.

If you make a mostake in placing a piece on the map, use the K from to crase the piece, Also, holding down the blue mouse button and clicking the red mouse button will cause the cursor to ser as in craser.

(Shortest: If you have towers and walls placed on the map and you want to thange from placing walls to towers (or vice versa), just click on the type of pieze already an the map you want to change to and the cursor will default to that pieze. This saves you from having to move the mouse down to the iten list every time you want to place a different pieze an the map.)

To prevent a proxinte from revolting, it must contain or be adjacent to a proxince with a 100pt eartle

Your castle's size is directly related to doubling the production of commodities as well as prevening the people from revolting. The corde's size is measured on a point system dependent upon the choice of pieces (tall or small). A tall piece is worth 3 yours, and a small piece is worth 2 points. In order to double the production of a commodity, a castle must be worth at least 50 points. To keep the people from resolving, a castle must be worth at least 100 points.

The last thing that mosts to be done in designing a castle is to decide the manner in which it will be constructed. You will have the options of Uniform, Conwest (start construction from mode), Inward (start construction from ourside), and Towers First. Click on one of these and your castle is now ready to be built.

If you wish to save your castle design, click on Sive and you will be able to use that design later, in another territory. If you want to access a saved castle design, click on Load and you can choose from any designs that you have created and smed (you must place your Ecop before leading, indicating where the castle is to be placed).

To return to the Main Game Screen, click on Leave, Once you have designed the castle, a tiny tower spinbol will appear in the map of that territory. As soon as you meet the requirements for building a castle, you can click on the territory and the Build Castle option will appear in the message window. The Hulld Castle sask requires one Grain: three Trimbet, one Iron and two Gold. You must have at least two Administrative Points allotted to the task:

If you visit your remnery while a castle is being built, you will be able to see your partially completed eastle. When the castle becomes large enough to double production (50 points),

What cruses for a real chart cruses to many to a real cruses to many you? I see that the cruses are crused and cruses are crused and cruses and fight and cruses are crused and cruses and cruses are crused and cruse are crused and crused are crused and crused are crused and crused are crused and crused and crused are crused are crused and crused are crused and crused and crused are crused are crused and crused are crused

la est dames

the castle symbol on the map will grow to half tase. When it becomes large enough to prevent revolts in neighbouring remaines, the castle join will grow again and fill the drin space.

MILITARY FUNCTIONS

Military tasks are those functions of your propore that focus on the augmentation of your army through the military tasks of recruiting utlancy, archers, and laughts. Other military tasks are concerned with adding weapons to you army which aid in attacking a castle. These includes building a ballitra, building a catagorit and building a singy tower. The other two military tasks are; sending a substem to another territory and, of course, attacking another territory.

THE ARMY

The army is your fighting force and, as mentioned previously, it consists of infantry, archers, and knights. To keep your Military atrong it is necessary to recruit troops. Whenever you engage in an attack or are the victum of salsotage, the numbers in your army may decrease. So, it is important to keep tecrniting and strengthening your army. To recruit for your army, click on the Army button and then click on Recr (Recruit) in the message window next to the branch of the army that you want increased (a lister way to start this task is by clicking on one of the inditary icons at the top of the serect).

In order to maintain the size of your army and keep your troops happy, you will need to feed and pay them. For every 5 infantry or archers that you possess, you will need to feed them 1 feed and pay them 1 gold (normbed up.) per year, livery 5 lenghts will cont you 2 food and 2 gold (also rounded up.). The troops are paid in the spring and fed in the automorphism delay feeding and/or paying them, increasing numbers of your troops will desert.

ATTACKING

one you have built your economy and army to a certain point, you will want to attack a territory, you will need two Military Points, a Happiness Kateng of at least three (see Happiness), and one from When you have met three requirements and want to attack, elick on a neighbouring territory (you can only attack a territory that is directly adjacent to one of your own) and the Artack option will become available. When the Artack Date II is full, you will be given the option of proceeding with the attack or recalling your troops. After you make this decision, click OK and the task of preparing your army for battle will be complete.

At the beginning of the game, you have the option to ser Tactical Bartles off or on. If the battles are off, the computer plays out the battle for you and determines the victor. If the battles are set, you will have more control over the outcome as you will be able to manipulate your forces individually (see the section entitled Tactical Combat for a detailed description of this aspect of the game).

In the battle

ated a WEAPONS

When you are attacking a territory that has a castle, there are certain weapons which can improve your chances of victory. They can be added to your assumd at different times during the game if specific conditions of your economy exist, and your ability points are high enough.

The Ballista is an essence, a guint excessione that tires a large auton at a castle. In order to build a Ballista, you will need a military rating off at least 5 and 4 of those points must be applied to building the Ballista. In addition you must expend I unit of timber, I unit of from and I utilt of gold.

The Catepul requires the same ansaum of commissives, but you must have a Military Rating of at least 6 and you must expend at least 5 of them on building the Catapuli.

A lage Town also requires the same number of commodities, but a 7 Malicary Rating is necessary and 6 of those points are moded to start this task.

When any of these three weapons become available, they will appear in the message window after clicking on the Army button.

SABOTEUR

PTs o hire a Sabotein click on the territory to be vibronged, the territory units be owned by summone. This task will become available as soon as you have a Military Rating of or leave 3 and use at least 2 of those points along with spending 1 gold to hire the saboteur s. A substruct is sent to an opposite territory with the intent of destroying soon appet of that territory's remaining or disrupting the military – perhaps sabotaging the fined supply or demoralising units of their military, causing them to desert.

POLICING THE REALM

Since your opponents have the same capabilities as you do, you must be war, of opponents of aboreurs. The only way of accomplishing this to to Police the Realm. This is another transition of the military that is generally successful in capturing aboreurs and spies. When you police the realm, the overall efficiency of any ongoing tasks improves as well. One negative by product of policing the tealm, however, is that it reduces the Happiness Level of your people by one happiness point (see Happiness.).

TACTICAL COMBAT

Once you have made the decision to proceed with an attack, or are the victim of an enack, the main game screen will be replaced with the Tactical Constant Screen (assuming that you.

The wale of the battle will be indicated at the battens of the screen. When the scale is L, each figure on the battlefield represents one unit of the army. When this value roads 2 or more, it means that each unit of the army is represented by two or more figures on the battlefield.

In this aspect of the game, where you tight is just as important as how you fight. The terratories consist of many letrain types, and the effectiveness of the different branches of the indirary will be influenced by the facation of the bards. For example, language do very well on open game or dimension are buildered greatly by rocky terrain in which the barses will have difficulty galloping. As one might expect, long-fit also have vertous problems in awarapy, watery areas where their excessive weight can cause them to such Archers are more effective when firing from a covered area, such as a forest, into an open area. On the other hand, archers have problems firing into a forest because their arrows are more lakely to steake a tree than the enemy. These are just a few of the terrain effects of tactical cambat. All of the effects are lossed on the performance capability of a military unit in a specific enternomera. If you are the definiter in a field (non-castle) buttle, you will be given the opportunity to choose where in the terrainty the battle will take place. Click on the spot on the map where you want to fight, and the forces will appear.

The first thing that you want to do in preparing for buttle is to place your troops. To do this, click on a figure, or figure, and then click on the spot where you want to plant them. If you want to move all members of a specific branch, click on one of the three busions located at the bottom right of the series (Infantry, Archers, Knights).

When you are attacking a casile, you can only place troops within a certain range of that cards. You cannot put them too close to the earlie one can you place them in the castle. A castle's most culmrable positions to attack are the doors as well as any breaches in the walls caused by a catapula or other machinery. The Plat humon gives you a bruter new of the inside of the castle when you are a defender. As a result, you will be able to see where you place your troops. Although the nalls have seemingly collapsed in the Flat mode, the castle is still very much intact for the purposes of lattle. It is purely a practical function that allows you to manipulate your forces more easily.

When troops that are attacking a coatle are commanded to Melec, they will attempt to reach the Keep as long as there are reactioning units to attack. If the troops attacking a castle are not given commands prior to burtle, all units will default to Melec and all engines will default to Destroy.

If you are defending a castle and do not select a command, Molec will be assumed. The exception and the billion will be minated optate the castle or heartens that will help to create breaches in the castle walls. These weapons will attack the nearest unbreached wall until destroyed. They will then attack the one behind it, moving forward if mecessary. The siege ower will assault a wall that is not already under attack from another weapon, it moves up to a wall or tower and releases a few infantry must on the top of thin wall or tower.

After you have placed your army, you are awaly to begin the bottle. The buttons located at the bottom left of the screen allow you to control certain aspects of the buttle.

Before chicking on one of these buttons, you will need to select specific troops by chicking on their (or by chicking on one of the shortent buttons on the right of the serven: To attack a specific enemy unit, first chick on the units of your army that you want to deploy, and then chick on the enemy figure.

the fratile of ominoquet. 111 1415; 1143 top zhied count victory of The Hundred Years War 1 the Federic A superbly mumid und a appeal Lealish diray of 13,000 difficient T. 1000 Frenchmen

The Stard button commands your troops to stand their ground and fight anyone who comes near them.

The Mile button commands the affected troops to engage in battle. They will search and destroy the pracest enemy unit, or if one is not in range, destroy the Kerp of a single engine.

Dot my is similar in Molec, welly the forces are communifed to attack weapons, or castles, before people,

The Romat functions causes your remaining fighting bare to leave the build are (it is not necessary to click on any figures on the screen prior to retreating).

The Bigit battom starts the leattle after your other commands have been guen-

Victory is achieved when certain conditions of battle have been mer. For a field frattle, you must either ball all enemy times or cause the enemy to flee the frattle size. A castle battle is wen when all enemy forces have been halled, the enemy flees, or a sufficient number of your troops reach the Keep and remain there for a long enough period of time (simulating the castle commander's death or surrouder). The amount of time needed to capture the Keep depends on the number of your troops at the Keep and the initial strength of the defender. The Keep cannot be destroyed by steps weapone.

In tactical condut, each division of your anny, along with the sirge weapons, has specific buttle purposes.

The infantry is your ground force. They are most proficient at hand-to-hand combat and are useful for capturing the Kerp of castle. They can also attack doors and climb castle walls.

"Either be hat ar cold: God doth Jestifie. alshor, and teen and all нециальных

Hobset Homb I

The archers are best at long range attacks and weakest at land-re-hand fighting. They are superfifor castle battles when peopled on the walls, and they can also attack castle doors and climb pulls. The higher they are, the further their effective range.

The lengths are fast on open terrain, slow elsewhere, strong at hand-to-hand und they can attack castle doors but cannot clinth walls.

The cannot and the hallots are used to knock down castle walls and create breaches. They have limited movement. The balliota is the weaker of the two. The singe nawer transports infantry to the rap of outer castle walls, avaiding the arrows of defending archers. This weapon is slow but quite powerful. None of the suge neapons are used in field buttles.

POLITICAL FUNCTIONS

Dolatical teals are those which allow you to learn about opposition terratories and those which Acternatic want relations with your appearants, Both the Scott and Spy tasks are considered political tasks. The other political functions are dispatching a diplomat to improve relations with foreign territories or the Pope, sending a merchant to stude goods, improving your Juppiness level. and summaning a coursel to inform you of any threats its your scales as well as the Pope's relations. with all the players.

The attitude of unhadpinen and only estimbal, it i more and nglg...71 met bestern cent corpetance inc trouble mitteli constance it.

and increases the total epil. of the -trantion."

THE RELATIONS RATING SYSTEM

Your Relation with your opportunis, the Pape, and the happiness level of your people or measured on a nine point, scale, Relations of 8 or 4 represent a close alleings, and better rading opportunities with that faction. Relations of 1 or 2 represents a state of war, with mark higher changes of heing substaged in attacked by thay faction.

Relations can be improved by diplomatic Political (tasks, accepting the other faction), diplomote missions, and performing acrons within the plot-lines that will make other leaders happy.

D chrism will be reduced by mocking a faction, having your spirs and saboreurs caught by It where attacking their allies, and by performing actions within the plot-lines that will now please them. The levels of these rannes are displayed in the message window after clicking on the Relat button.

THE POPE

CT mee the Pope is the ordy one who can declare you King, it stands to reason that mountaining O favourable relaxions with him are extremely important. Your relations with the Pope can sometimes be improved if you send a diplomax and offer gold as a show of good faith. If you let your relations with the Pope slip to 2 or lower, you will be excommunicated. When this happens, you can no longer teads with anyone or send further diplomatic missions to the Pope. The only

Zeal wichma knowledge is a rinaway home.

Emplish Proveds way to improve relations with the Piepe after bring esconmunicared, is no code one of your territories to him. When you do this, your primit will improve by three points.

To arise a territory clack on that territory and affelt again on the Code aprillia. If you code a territory to the Pope that has a casely both on acyons relations with the Pope will improve by Jour points; You may code a territory to the Pope even if you are one excommunicated. In that case, however, you will only improve you relations by one points with no castle, and two points if you code a territory with a castle.

You cannot rade a territory to the Pope if it is adjacent to one he already owns.

HAPPINESS

Your Happiness level registrents the morale of beah your people and your army. If you let your Happiness level drop too loss, you rais the possibility of rebellium To anytone your Happiness, you can employ the Happiness task, which requires 2 political pounts, I touch I tender, and I gold. Completion of this task boosts the happiness of your people by one point.

If you attack symposic and lose, your Happana will decrease. If you are attacked and lose your Plappaness may or may not decrease, If you are attacked and win, however, your Plappaness will mixture.

Your happeness will also decrease when you are Driving your trades. When you police the realist the people are placed under constant scrutiny and they will not appreciate the builders and occupations that will be directed at them by a regident government. One way to avoid the discontent of the people is to simultaneously improve Happing while you are Polyang the realist.

SCOUTING

If it is recommended that heliere you attack a territory to sense a substitute, you should scout that territory to be sure you know who owns it. Scouting tells you who holds a territory, the commission peaces, and if there is a casele to that territory.

The sconting task regions I political point. To institut it, click on the territory that you wish to some and then chell again on Secon when it appears in the message window.

It is a good like to Schen a territory more than more, especially before anacking it, as territories can change to unording rapidly.

SPYING

Where scooning provides you with information about one of your appearant's territories, the Spy task can provide you with information about his entire trains. This task requires a political rating of at least 5 and an expenditure of at least 5 of those points and 1 gold.

When your decide to use the Spy furction, click on one of the opportunity territories and then click opportunity for the Spy bottom that will appear in the missage window. If a spy is successful, you will learn the number of territories that a particular player holds, the whereabouts of those territories, how bug his army is, and the Happeness of his people.

Jass before a trace went into effect between Philip VI and Edmand of England, Philip invised secret of Edward's Knighn to his must,

However, of that player happers to be Policing the testor at the time that you send a spy, your afrances for sources are greatly reduced. It that player captures your spy, relations with him will thop.

MERCHANTS

When you want to mercase the amount of a commodity, but you do not have the capability to gather is at that particular tape or do not want to risk a transaction on the Black Market, the Market tape to the Market also Market tape to the following task can be quite useful.

You can send a merchant to trade with an opponent or the Pope. Your merchant will have the best chance of meets if you have good relations with the territory with which you are trading. The chances for a successful trade can also be improved if you apply a high number of polarical points toward thay task. To main the Merchant task, click on the territory with which you want to trade. A Merchant list too will now appear in the message window. This task requeres that you have a Political Raining of at lease 3 points and experted at least 2 of them.

Once they period they were perested and britisaded archivat trail.

They executed

to de questi-

of the king of the

fearmoment.

Needless to say there would be no trace

DIPLOMATS

If you desire to improve relations with any other player or the Prope, you can send them diplomates. This function requires a Political Rating of at least 2, and an expenditure of at least 2 of those points and 1 gold. Like the Meritan task, the minuter of prolitical points that are applied can increase the chances for successful diplomacy. The diplomat is disponented to a foreign territory with the intent of offering or requesting gold to improve relations. If the diplomat succeeds, your

telations with that territory will improve by one point. The Diplomat can also be used to request gold from a territory with which you hold favourable relations, thereby approving your economy, he seem as the requirements are one for a Diploma task, the aprilion will appear in the message window after the Belia buttori is accessed. To ergoge the took, elsek on the Diplomat burton next to the ruler with whom you well to interact. Options for negotiation will now appear in the message windows. Clark on the arrows until you achieve the desired range of aegotiations you wan your Diplomat so propose. You will have the option here to declare the amount of gold that you are offering (or requesting). You can also propose an ally treaty with the leader. When you finish your proposed, slick OK and the Diplomat will be sent.

COUNCIL

Summaning a Council provides you with information gathered by the members of your succeptive council, it is basically a status report of the order realm. Upon completion, this task informs you of each player's cards status with the Pope and informs you if any of the freedom's that you hald are near rabellion. This option will be found in the message window after sticking on the Relat button as long as its minimum requirements are satisfied. To summon a council you need to expend a pointed points. I food, and I gold.

When this tesk is finished, the results will appear in the form of a chart or the missage window. This chart will display a list of all the placers, in order of strength.

"On the Plains of Hestination bleach the lowest of coupelless millions who, at the dawn of victory, set down to unit, and uniting died."

If a player has a racing of S or 9 he is considered Blessed in the eyes of the Pape. Below the naturest the status of the territories of your realist well be instituted (if any of them might be near rebellion in the near future).

-G,W. DeciVAdial Stavenson

WINNING THE GAME

Your score is displayed on the Message Window door at the Jones right of the server. When you have achieved a score of at least 7,000 points, you turn the apparentiate to perform the Point to many cost Kinds.

To perition the Paper you must click on the Class batton when it appears in the Relations ment.

After you have peritoried the Peper you must keep your point total above 7,000. If you maintain that point total for approximately 4-5 computer mustles, you will be maned King and the game will be over.

Making a claim to the throne does not make you popular with the other players, however. Claiming the throne will cause an immediate drop in relations with other factions, and even those who were friendly with you before your claim, may choose to attack you talker than risk loong the throne.

OTHER FEATURES OF CASTLES II

MESSAGES/PLOTS

Periodically, during the course of play, you will be visited by messengers who will appear in the message window with news and information. Some of these Plat will test your ability as a brailer and as a diploman.

You will be asked to resolve a variety of structures and you will be given several uprious with which to do so. The plots can deastically affect your fortunes, both good and bad. You may make new friends or creatures, that can help or hinder, your efforts to claim the throne of friending.

You may have in deal with problems from outside Breragus. You may also find steasones, deal with discours, and be forced to make crucial alliances.

FILM CLIPS

Occasionally nowice clips will appear in the message window at various moments during the game. When, for example, you are preparing to attack, the many window will summings feature a few seconds of a digitised film image of moops preparing for a battle.

There are several film (Tips which here been chosen for specific situations that arise during game play.

This feature can be turned on or off in the beginning of the game.

OPTIONS

The Open Institut as incurred on the Main Court Series put above the message window. Here you will be able to pure increal builds on or off, man plots on or off, turn the music on or off, in quit the game. You will also be able to save a game and load a previously played game.

To do this, click on one of these selections after the name will appear click on OK and your gitne will be saved or a past gime will be removed, depending upon which function you have chosen. You may also press the flow burgon to passe the game.

CHRONOLOGY

1302 - Philip IV called together the first Estates-General, the incestor of the French Performent.

1309-1377 - The August Papacy (the Popes were succession a of Frenchmen).

1328-1350 - Reign of Philip VI (first of the Valois rules)

1337-1453 - The Hundred Year' War between England and France

1378-1497 - "The Great Schism" or the church (two Popes were chusen at the same time - one Roman and one French, causing great controversy).

PLAYER PROFILES

Contenders for the Throne EDWARD KING OF ALBION

A flown has one of the strongest claims to the throne of Bretagne, dating back many generations. Edward is the sun of the confe-building King in the original CASTLES. Edward is a strong rules who ariempts to be noble but his self-inglatenties of it in the way. Edward is married to Edna, but the marriege is a loseless our, and the two people despite each other. Edward would love to have Edna foreshly retired to a numery so he could remark, but tested figured a way that he could do it without upsetting the nobles and porting Album in turnoul. Edua looks to humiliate Edward at any chance the gets.

Edward's attitude to:

CHARLES OF VALOUE: An arrogant monster, and Edward's chief real.

PHILLIE OF BURGUESDS: A friend, but only from a distance. They both despise Charles of Value. Not much personal integrals.

RAMINO DE ARAGON: Not to be trusted, but not an atmosediate threat. Hamito is a King, and ismore worthy of respect than a Duke or a Court.

HUNRI OF ASJOUT Plus contempt. Hern is an overgrown child with a monstrous number.

POPE INNOCENT BENERICT: Indifference Pope Immoent Benedict has never been fould of Albion.

CHARLES COUNT OF VALOIS

Charles is the common of Charles of Clossau, the late King of Breague.

By family ugs, Charles has the most solid claim to the throne. Of course, both Albion and Anjou would argue that the late King's claim to the throne was rather disbinus.

Charles is known for his arrogance. He makes no scere of his contempt for the other claimants to the throne; politics is not his force, but he is a formidable general. As a ruler, he tends towards appressiveness and enactry, His one peculiar odding is his forcings for his landing broads, which he dotes on as if they were his grandshilders, and one in particular, a broke named Solia.

Charles's attitude to:

Erwann on Annion: An insufficiably self-righteons egotion Munial entury cases between the two

PHILLEP OF BURGURDY: A Exemp politician, and the chief thorn in his flesh. Phillip is a lying, cheating swine.

RAMERS OF ARAGON: Clarks doesn't know him well reisigh to have him, but would resid him.

HENRI OF ANJOU! Pure combinips. Henri is an overgonen child with a manazone musher.

Pope Innocent Benedict: Charles wants to calificate a good relationship with the Pope, and use the

Church's support to turn licetague auto a European power that will rival the Empire of the Lentons.

PHILLIP DUKE OF BURGUNDY

Difflip is the pumpered sun of a toppish Duke, and acts like it. He prefers to great a good face wherever possible, letting his retainers do his dirty work. His claim to the throne is carrenally weaks he simply intends to grab whatever power he can get. Pfullip is cought between the polities of firetogue and the Holy Tenton Empire, to which funganely owes its fealty. Pfullip has only one taken, and that is diplomacy. He knows what people want to hear, and he will tell them that. Prople like him because he makes them feels good. He does not, however, fullow his word-with deets.

Phillip is also a habitual nomanior, a habit that has gotter him in trouble on more than one occasion.

Phillip's attitude to:

EDWARD OF ALBION: An enemy of his commy is his friend. If Edward were to obtain the throne, it's likely that Burgundy's power would increase.

CHARLES OF VALUES: An insufficially self-righteons opinis. Musual emitty exists between the row.

RAMERO OF ARAGON: Phillip doesn't know what to make of him-

HERRI OF ARIOU: How can you respect a man who has not yet emercal puberty?

POPE INSOCEST BESEDICT: Phillip does not appreciate the Church's teachings against womanising, but can usually talk his way out of models. The Church is an organisation to exploit or to ignote, whitever is most convenient.

RAMIRO KING OF ARAGON

Ing Bannot of Aragon to the smooth power-hongry as be in greedy. He has no legitimate claim to the throne of Bretagner he simply wesles to get as anoth wealth as he can during Bratagne's ried war. He is a shadowy figure who works behind the second and controlled, and addicted to work. He is a shadowy figure who works behind the second, although he can be quote extravagon when he awards to flaunt his wealth. At persons, Aragon's neighbour Casade is undergoing a sivil war, and the Moors are making their province known in the South of Aragon. Ramino believes that by taking the gold-rich provinces of Bretagne thering their moments of weakness, he can fight the Moors, ancer Casade (regaining land that his father lost in the process), and make his treasury wealthy beyond the chearns of men. He keepy lost goals to himself; not even his most trusted advisors are sure about his plans.

Ramiro's attitude to:

EDWARD OF ALTION: As a fellow King, Edward demands more respect than other altimants to the throne — until he gets in his way.

CHARLES OF VALOUS: Charles has the right temperament to be king, he just flaunts himself too

mach. A king should be cruel and arrogant, but they should have some capacity for subtlety. PHILLIP OF BURGUNDY: He's not close enough to really warry about. As a political wearel, he might be easy to manipulate.

HENRI OF ANJOU: He's a find, and a find hardled properly, is the best forest you could possible have.

POPE INNOCENT BENEDICE: Arague is a deeply soligons, head, but the Pepe is can exact at a factor in Ramaro's place, and the two men dalloe each solar.

HENRI DUKE OF ANJOU

A selation of both Edward of Albion and Charles of Valori, Henry despises them both. His claim to the throne is as good as Edward's. Henry would rather not be king; he would rather laugh and sing in the garden, but his mother. Mane, wants him to become King. Marie is the soal-power in Arion. Long ago, Mane was in low with Edward of Albion, and they were betrothed, but the late king Charles forbed the marriage for political reasons. Mane was furnous when Edward matried Queen Edua, and sowed revenge. All of her life has been spent manipulating Angus unto grabbing control of Beetagne and destroying Allborn.

Henri's attitude to:

EDWARD OF ALBION; He's too self-important, Henri secretly admires some of Edward's more tooble qualities, but hides that admiration belond jealousy and space.

CHARLES OF VALUES: Charles results Henri, Henri doesn't like to be resulted. He doesn't like Charles.

PHILLIP OF BURGUNDY: Hemi likes what he says, doesn't trust what he does, He's also gralous that Phillip is more popular than he is.

RAMERO OF ARAGON: Who knows what's really on his moul! Mother doesn't trust him.

POPE INNOCERT BENEDICE: He's the Pope, Gud says you're supposed to lose the Pope, right, mather?

POPE INNOCENT BENEDICT

Driven from Rome and into calle in Breingar, Incocess Benedict is still the mass respected tigure in Christendom. The Pope wishes to regain the Popal States from his adversary, Autt-Pope Christopher. He wants to see a strong leader emerge from the Breingasse civil war and help him tigain his lands, and resume the scheme that has affected Christianity. Although the Empire was largely responsible for his rade, he hopes to make amonds with them and descripting support for the Anti-Pope.

FOREIGN POWERS

HOLY TEUTON EMPIRE ("The Empire")

Burdering on the cast of Bretague is the Empire of the Tentome Princes, also known as the Haly Tentom Empire. This Empire is an alliance of disease of quarielling shorts and princes held together by Emperor Louis, an aging Basarian Prince who is turng of interminable wars and

politics. The Empire is contently engaged in conflict against the Sauceus in the East, and is allest with the Hongarians and the Venetians. Their chief goal is to keep Constantinople, which is governed by the Empire's papier, from filling to the Saraceus, which would can off the extensely locative Eastern reade comes currently controlled by the Empire. The Empire is always willing to help a friend — for a piece.

THE DANES

East of Fluiders, the Danes control the nonthran was. Once home to the fierre Vikings the Danes are considered to be a civilised people; they want control of the Chaptel and all shipping in the North, in the hopes of becoming a major European powers this ambition has are them in conflict with Albion, Valors, Fluiders and the Empire.

ITALY

South of Beetagur are the great Italian city-states. Venues, Genera, Milan, and Roma, They have become formulable places of commerce, home to many of Europe's most prosperous merchants and moreylenders, and ruled by extravagant Dakes, County, and Princes. They are almost always at war with each other, and bear little lave for ruther Beetague or the Empire, escept for alliance of convenience, of course.

CASTILE

This mighbour of Aragon make a great deal of Jand from them in a war thing years ago, and King. Ramaro has been triving to get it back ever since he came to the throne, Ramaro engineered the end war that is concernly wrecking Castile, what the King of Aragon did not count on seas the ruthlessness of the leaders and factions in this war — he has been unable to get the lard be had been hoping to grab.

SOME BRETAGNESE PERSONALITIES QUEEN CATHERINE

The notions of the late King Charles, Queen Catherine was considered "the power belond the throne" for many years in Bretagne, Undonbrodly she and, but dotting brother Court Merose, will want some say in who roles Bretagne, as well as guarantees of personal security.

ARINSEAULT

This philosopher/demagogue is a hear of the Paris Mob, and considered one of the most cuming philosophers in Europe. His suppore would be an asset to anyone who obtains it: although his eccentric nature can be irrating, and he does have many cremits.

.

BISHOP WINSLOW

The mast conservance cleric in Breagne, It is sometimes said that he still objects to the Bible being peritten in Letin instead of Aramaus, Warslow is troublessome to deal with, even for the other dergy in Bretagne.

SIR PERCY OF NARBONNE

An old friend of many of the claimants to the throne, Percy is something of a top, although one with considerable brains and determinations. He is crossed for his distinct of violence and his protectiveness of the people of Nathunue.

DUKE FRANCIS OF BOURBON

Although not a claimant for the throne. Duke Francis has one of the largest armies in Bretague, and an extremely independent attitude. The Duke of Bourbon would rather the than offer feality to another man, and will do his best to demonstrate Bourbon's undependence to any would-be ruler of Bouragon.

Becoming King in CASTLES II demands careful planning and resource management. Here are a few hints from the experts to help you meet these challenges.

THE ARMCHAIR STRATEGIST'S GUIDE:

Expandet Edition by Vine DeSirts Templay Predictions due William C. Feter, Quartifur Septian, Inc. Biologia, Seconder 13, 1792.

Herromong a Korg in Casales II demonds careful planning and necessive management. In also requires a clear anderstanding of the rules of the game. This document provides a decailed explanation of how to play the game and surmount the obstacles that will be placed before row

WARNING. This guide offices specific hints and playing techniques for CASTLES II. Players who prefet to learn the subtletes of the game on their own should not tend beyond this Artificial Intelligence action of this datament.

GENERAL PLAYING HINTS

Some subtle aspects of CASTLES II may be lost in a first reading of the manual. These few pointers may make room first experience with the game much more pleasant:

- Use the flow button to good up the clock while waiting for an event to secur. This works in both the Strange and Landert mode.
- 2. Definiting military fract are always approximately our-half do not of a player's total without force. He combined so stations that 2 trenders can proper in in definite in other words, to half on the fold not the army panel by the controlling player. In the proper, the number of each tripe of min to good to one-half of the contest of such arms to the.

player carrier trainless up the example, a player with three infantes and five waters would drive that two two intents and three arrives.

The defender still has an edge, browever. The strength of each individual defensive unit is adjusted opward slightly to account for the defender's superior knowledge of the termin. The defender also gues to choose where the barile will be flought. This offers a significant advantage to the giver player. Finally, the attacker will have a very difficult time witning unless the odds are greater than 2-1 in its broad (this includes morale, which is not inuncaturely measurable, just as in real life.)

The battle spaters works both ways when you are attacked, you defend with half your forces, If you loss the battle you may then launch a recalancy arrack on the other player, who will defend with half or whatever forces remain after the first attack. Also remember that every unit loss to either player removes one unit of that type from the player's forces. However, since the defender only fields an array half the size of its total force, it can never be wiped out in a single battle. The attacker, however, can be completely eliminated by a solid defender. A constitution of the core-provid aggregator.

The intent of this design is to retrourage back-and-forth skirmishing. It also places the greatest risk of loss on the player who have the most to gain a the attacker. The design applies to both the computer players and the human players they abide by exactly the same rules. This occludes the tile which provides at least one infarary and one Archer to a player with no military forces. We assume that any retritory a Human or computer a is capable of offering some defence to an intacker, however meager.

J. Your army's morale is boost on the Happiness of your people, Buttles may be won and low solely on morale. It has a very strong effect on the ourcome. He sure to keep your Happiness at least as high as that of your neighbours.

ARTIFICIAL INTELLIGENCE

CASTLES II employs two suphisticated, multi-level artificial intelligence engines for the computer players some for Strategic mode, another for Tuctical mode. Only the Strategic Af is discussed in the analysis.

The Strangic Al assists of medium level and high level portroms. Actions are initiated through the same task mechanism used by the human players. In fact, the Al players were leved by letting une of them pure the game to place of the human even displaying results on the same user interface.

CASTLES II was exhaustively plagrested for six mouths. Every aspect of the gameplay was critiqued and fine-tuned. This was an especially complex task for the artificial intelligence routines. Many of the AI algorithms were resented several times until they became satisfyingly realistic. Fortunately, the computer players use the same tasks as the humans. The tuning factors were based on empirical adjustments derived from actual human players. The result is a series of opponents who play as a level equivalent to that of an expert litinian player. The Easy and Impossible difficulty levels on the game were created by adjusting deficutely more than a dozen factors in the playing style of rach appoints.

The medium-level AI maintains appropriate levels of commodines and military forces, and emories the safety and security of the kingdom. It issues Cather and Recruit tasks whenever it decides to increase its military arounds. The medium-level AI can send Merchanis (this is a good way to find out if a computer player is experiencing a shortage of a given resource, by the way). The aredium-level AI also scarts a Plappiness cash when the peoples' morale drops, sends Scottis to traighbouring territories, and Polices the realist if it is being Sabstaged or Sport upon.

The medium-level Al does not think very other. During playtesting, this Al was feated to be extremely agile in its response to changing conditions in the game - Lie more agile, in fact, than any reasonable fitnihung was reduced to compensate for this. One other adjustment was made. Since the computer players do not get the benefit of plots or rendern events, which give "freches" to the human player, the Al were given the ability to obtain one man of a given resource if no units are available in their authorities and the computer wants to true a task that requires that time. This about imageneous partially for problems which arise shir to their reduced frequency of thinking. This only applies if they are completely our of that commodity. The computer players cannot pile up large stocks of goods in this manner. Also, they do not possess this special ability at the Easy difficulty level.

The high-level AIs handle the inner complex thinking in the game. They use a modified version of a traditional AI approach to practitisation of their various options. This keeps them from becoming locked into simple patterns of action. Attack, Build Castle, Sobieter: Spy and Duplomat are high-level AI tasks. The computer evaluates each task based on a large number of variables, it may decide to attack a particular jerritory because it contains a commodity that is in about simply, or it may back off if it finds a castle there. It weighs all of the possibilities and closures the one which is the best means of achieving its goals.

STARTING THE GAME

At the beganning of the game, your focus should be on grabbing (emitory. This cance) he done in a baphazard manner, though, Your most important goals should be:

- I Both a old, drienoide percenter
- 2 Pewer all Jour type of resonan-
- 3. Crank your remains up to top spirit as agon as possible

Most of the places begin in one corner or another of the map. The box stronger for these player is to aim for an initial size of five or six registroirs. Conquer 2 for immediately, preferable by building a "stall" of territories that you ones, behind which may be a few that you do not yet own but are inaccessible to the other players (the other players rannor "leapting" and get to them). Then, conquer these other territories.

Territories will recoil of not subjugated by a show of force. You must therefore begin to build carties once you control floor or five territories. Try to build just one caulic preferably in a training which borders every other territorie that you won. If you are formate, or have planned well, the territory in which you build the castle will have Gold as a resource. Make sme that your castle is at least 100 points strong, so that it will present results in all neighbouring territories. The castle will not prevent revolts until it reaches an appropriate level of completion. Be sure to stait construction early enough to cause that your people will not revolt before the castle trackes this critical size. One good way to speed up the construction process is in skip the mout it slows the construction process significantly.

Politics also plays a critical role in the game, even at this early stage, Mike sure your people are happy. Make sure that the Pope likes you. And try to keep your endours at try by busing them off accomingally until you can become strong enough in fight than effectively.

TOUGH CHOICES

Once you have your mixed territories under control, you may choose any one of several approaches to the game. The game can be won through military compacts, administrative power, or political expertise, although the obvious military approach is the easiest. Make a decision now as to how you wish to proceed, and stick to it as long as possible.

The game will place fir more demands on your resources than they can suppose. You must decide whether to make your people happy, build alliances with your neighbours, build castles, or build a dominant unitary force. Your basic strategy choice will determine which of these will be employeed.

There are a few general positives that apply to any strategy. Keep these in mind and you will always be in control – as much as possible, anyhors, And, lost pair alimb, that these pointers are rust important, just remember that the other players ARE using them.

- I. Give every ability point you have. From if you are not enuming a Military task, for example, apply the otherwise amount Military whility points to moster task until as a Coulor. The well serve the dead purpose of ministring this spirit of the gather task and group you the extra push towards rating your whility rating. From Military whility will not increase as quality on if you were remaining Military tasks, but one contribution in the right direction is helpful.
- 2. Stay friendly with the Pepe Manter your relation rigularly. Remember that attacking a friend of the Pepe (need by the word "Bleand" used to that player's same in the Canada display) will cause your relations with the Pepe to disregate by one passe. It is very easy, therefore, to become excommunicated through carefulness.

- 3. Vary principle, or at lain 20 marcal terms. Enlatings of F to be, with new neighbors. The father pain calatized with term, the law includes are to mark or substage case. Also, case Montana, on filedy to get better deals of they are duling with travailly parties.
- 4. Mantani a entrendik arniv azz. Male it no antali and yore nightima par, ethnik when their open docrere that you are a conting. Make it too large, and the mantenance toot soil drag daten your assume.
- 7. Send Explorate to "bey of" amount whi on attaching you. Usy enumeter fromthy agreem and on less black to estudy a logic best tracked a deplorate agreement enough the foresteen day power stepll around who are absorbe in the process of attaching to your Deplorate may be not late in fee allegars. Also, enumer remember your bentle acts from longer than they enumber the constant.
- 9. Hine in term of small compagns. Before landing witch, put a small memory of termines to capture, build of case army and then go. Don't law off more than you can then! (Mer graphing a couple of greatmen, concluded some parts initially your arms and true caule (or defense, Never go gettly), as an extremely represented empire crowdles very quickly!
- 7. Always berned your resource. For wall not then up sery rapidly as correcting you do not more and/or golds. Try to result hadding a sould notel your Administrative Rating into 5, allowing you a sound task in this energy. Then here betweening as you build.
- 6 If you don't have a good mix of remmediate in the territoria you own, you can still have a good economy. Try is harvest the commendaty you have the most of and they trade them for what you need. You'll need good relations with a trading partner to pull that off, but at works will write you don't have saints to from and gold. Always remember that the black market is risks, but it can bolk ball you put of tybe attentions.

MILITARY MIGHT

Many players initially try to one the game through braze military force. Unfortunately, being a leader means more than having the largest army. You must also make friends with those who can be most helpful to year. You must choose your stranges carefully. And you must manage your trainnestly trough that it does not ranish in a midden space of revolus. The fullnowing hims should assurable does not train the full manage hims should assurable does not ranish to the full manage hims.

- Obtain Ringite as seen as proable. Build up to a Milliany Ability facing of telly exercising and standing. Don't
 police your earlier wales at's exercise!. Take a rais in order in build up your faces were rapidly.
- I Harld past complexables to present results. You can hall then without exacts of your in a by horn-
- 7. Make user that was base pleady of Iron and Word immalls, as that you can build a big army. Then make over that you have pleady of Food and Gold to pay for these forces. If you have then the so faithers to pay, you may very well buy the game.
- 4. Chaire your enumes perfolly. Only attack one at a time. Express to proper two at and and sulf almost certainly end indicate. Send planty of Diplomate to the other player to keep how off your back. Bender, you can get better making from with that player word you're ready to attack.
- Andrack a weak appearant. Call a Council and see who is or more weak whom. Then exact a neighbour who is howy lighting someone that.
- to Don't annot Blessel players unless you have no other shows. The Pepe wall many you a great shall of graf. You should now need to be excommunicated.

ADMINISTRATIVE ACUMEN AND POLITICAL PROWESS

CASTLES II may also be seen through administrative aught and diplomate survy. A player with six well chosen territories and many cardles can prosper and min without spending enormous amounts of effort or multiply contraines.

- 1. The key is an information extent it maintaining the happoint of wore people and beauting after with the other players. Run Happoint and and and play of Dislamiti to your prightness.
- L bons on drawing Gold terminas. Yea will and Gold to but off your naithours and the Pope.
- 3. Build a mederate-stead standing army. If your explicates integer that you have a must army they are entered tools to estudy you. Known by that forest first army have more than the defender joiner the defender will move how more than half his army in any guest hardly so you can do a great dealey damage to tomage to be date attack you.
- A. If you get attacked, and Diploman. If relation require, your exposent will importance be less willing to attack upon. Keep up a stack strain of Diplomes and you may be able to cover a transformer's be less well attack.
- Soud Liu of Merchant and Deplomate. Political Abday points are the most distinut to achieve, but you will have plonty of time to get their may you will be opening four execution on military attents.
- 6. When other players like you a ket (Relations of 6 or 9), trade will be more advantageous. You can actually make a profit on tests of you work hard at at. Every unit to your stability but you date to vintery.

1 Deal) forget that your private well from an you when you Claim Relations will drap by our point under very other player. I an well wellfield by the target of immercion Substances and Attacks. By proposed, four legion you dame, leaded up a substantial army well player of Records and Attacks.

LONG TERM STRATEGY

The goal of CASTLES II, ultimately, is no surrow long enough to become King. Once you have established your initial fielding, it is time to pur pour overall strategy to the tent. Proceed on the elements that you drent most important, as noted above. We want tell you how to win. There are many ways to wan in CASTLES II, and pure of the fun is in discovering them for yourself. However, a few general pointers too later in the game may be partanted.

- I Build a buffer of extra panal lefter you Chine. Once the other players get would if your product at removal to ex. Claiming serborn relations by all other players with you. This was pull you very reguldy min overface. Make your that the hot of panal due to the deep in relations, play the diety due the attachment with the play due the attachment with the play due the attachment will receive, will not be account that the Pape deetler to report your claim.
- 2. Dursing when to Claim is a reaky disease. If you are the first to any convenie wall take their abot at hindary you down. Hanny for assessed rive to date first in a tricky path to follow because you might not have rough into or power to know him down and, of more players claim in the maintime, all turn and a face-for-all. I date allow have parte a from and part by he modeled in Mayde that's not make had idea after all?

Administrative Tasks

HARVEST GRAIN

Harvesting Grain requires an expenditure of at least one Administrative Penul per Grain territory lurrested. If a castle is present in a Grain territory, an additional Administrative Point must be specified gain the additional Grain.
